# Mobile Storage Systems

## Mobile Features

Today's storage systems demand better use of space, increased flexibility, and adaptability for future growth.

### Unique Rail Guidance System

Aurora's exclusive mobile guidance system provides straight tracking carriage movement with no play between rail and wheel.

- Patented Concave Wheel/Convex Rail Design.
- Even heavily loaded carriages move smoothly and securely.

### Exclusive Rail Design

A barrier free rail makes the mobile system accessible and eliminates tripping hazards. Mail or supply carts are no problem as they roll easily over the rail.

### Perfectly Aligned Rail

Dual pins ensure perfect alignment where rail is joined together, eliminating movement in any direction.

## Safety Features

### Mechanical Assist Models

- Premium Aisle Safety Lock prevents carriage movement when locked.
  - Optional Mechanical Safety Sweep\* stops carriage movement by a quick tap of the foot.
- \*Available on 1000 Series Only.

### Powered Mobile

Passive Aisle Block feature protects people and objects in an aisle. Passive Aisle Block requires the user to return to the open aisle keypad before opening a new aisle, ensuring the safety of other users.

### Waist High, Carriage, or Aisle Entry Safety

Infrared safety options that stop carriage movement when beam is broken.

### Master Control Panel

- No computer interface required
- PIN Code Access for multiple users
- Selective Security with Aisle Lockout
- Fire and Night Park
- Program carriage speed and stopping distance

# The Many Options of Mobile Shelving

---

## Mechanical Assist Models

Mechanical assist gearing enables smooth and effortless movement of even heavily loaded carriages. Special gearing allows for fewer handle turns for faster retrieval. Available in 1000 Series and Low Profile carriage heights.

## Aurora Condensity

Developed for high density top tab hanging files in drawers and general storage, Condensity saves investment, real estate and installation costs. Available in either mechanical assist or powered versions.

## Aurora Powered Mobile

The intelligent choice for high powered storage applications with plug and play operation, selective security - the ultimate in safety. Available in 1000 Series and Low Profile carriage heights.

## Aurora Side-to-Side

Imagine two or three rows of storage at your fingertips. By moving the front row left or right you have access to the back row. This modular lateral mobile is a simple and versatile system that can grow with your business.

# Planning for Expensive Space

Growth in weed being recreationally legalized calls for an increase in competitors making it harder to compete with other dispensaries that also grow weed, some marijuana clinics promote new strains or come up with unique sales tactics to get more customers — the best way to be able to compete in producing the most weed to sell. Nothing competes better than numbers. With most weed facilities taking place in ground-level warehouses, it limits the amount of growth that will be done. A way around this is to look for multi-floor warehouses or to build a second floor. Not only is it costly but it creates a new work environment for employees that isn't time-efficient. With pricey real estate markets even, a single warehouse is expensive. The most important consideration in evaluating a potential grow space is ensuring proper ventilation for your crops. Cannabis plants require a lot of light, which typically emit a tremendous amount of heat. Without proper ventilation and air exchange, producers risk cooking their crop or limiting yields due to excess humidity, heat, or oxygen.

Keeping each leaf indirect light, as well as having enough space to create constant airflow calls for struggle. Crowded plants inhibit air movement, which can result in the growth of mold, mildew, and other pests. Plants need extra care and attention; they need to be accessible from a full 360 around the plant. Aisles need to be wide enough to allow multiple employees to work from all angles. Proper spacing to plants to ensure they are getting the most exposure to light, which produces bud formation Indoor cannabis grow facilities must be in an enclosed and secured facility with functional windows, doors, rigid or semi-rigid walls, and a roof.

Running a successful commercial cannabis grow operation is an expensive challenge. While growers can maintain a higher level of control over humidity, available light, and pests in an indoor environment, maintaining proper light levels and staying as energy-efficient as possible are top priorities for commercial cannabis production operations.

# The Mobile Shelving Advantage

Twenty-five years ago, we were providing mobile shelving solutions to law firms, government agencies, and into the health care market for records storage. Since then, the computer has become an enormous success, and those paper records would primarily become digitized. Since then we have moved our focus to storage, primarily warehouse storage solutions being Pallet Rack and boltless shelving. It was an excellent find and a significant segment of business growth. We also learned there was a need for security cages, modular buildings, automated storage solutions, and much more, which has provided much more impressive growth to our business. Discoveries in the warehouse and the attached market have lead us places never dreamed of, including Lab opportunities. It spawned a vast new industry for us, Labs USA. Now NationWide Shelving will be selling mobile shelving for growing operations, so far fetched, but here we are providing mobile shelving so that marijuana operations can maximize the harvest. Not only do marijuana growers use mobile shelving but growing operations of all kinds are finding the need for shelving solutions to optimize the use of space.

## Benefits Gained

NationWide Shelving created an effective and natural solution by reducing storage space by three times using mobile shelving. Each shelving unit can be as long as it needs to but are all able to move in an efficient way using the mechanical-assist handles. Since the mobile shelving unit is so secure, it can support two levels of plants, any lights needed, and fans ensuring the facility reaches its full potential. Since NationWide has been around for decades the mobile shelving system has already proven to stand the test of time. Because large-scale marijuana growing operations is still a relatively new concept, many communities are still developing local building regulations, but NationWide's team has decades of experience in working with local officials and contractors to ensure that mobile shelving systems are in compliance with all applicable codes.

# Growing Even *More*?

---

NationWide Shelving offers all storage products for growing marijuana. Including:

- Wire Shelving
- Drying Racks
- Carts
- Rivet Shelving
- Lab Furniture
- Fume Hoods

And Many More...
